

Delivering on the Children and Young People (Scotland) Act 2014 for our most vulnerable children

Melissa Van Dyke, PhD, LCSW

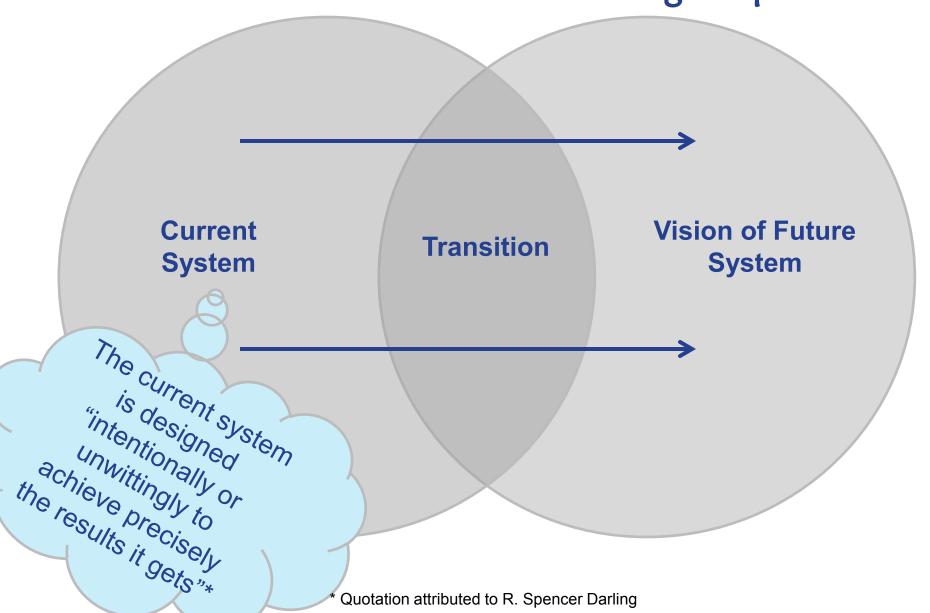

National Expert Advisor on Implementation

University of Strathclyde

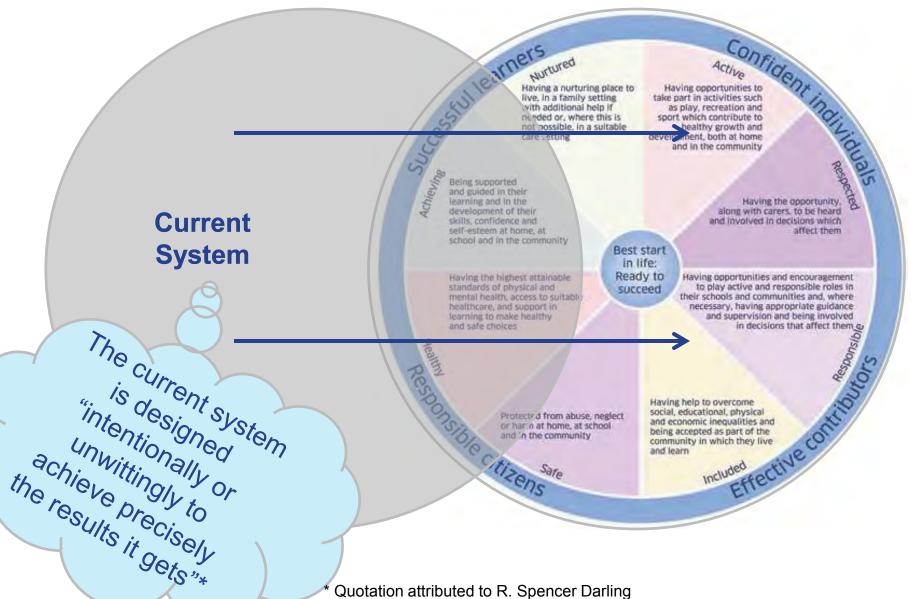

"the place of useful learning"

CELCIS 2015: Travelling together 7 October 2015

Getting Better Outcomes for Our Most Vulnerable Children and Young People

Getting Better Outcomes for Our Most Vulnerable Children and Young People

Vision:

Confident individuals Having opportunities to take part in activities such

as play, recreation and

sport which contribute to Defines the optimal desired future state with and at home

Being supported and guided in their learning and in the development of their skills, confidence and self-esteem at home, at school and in the community

Having the highest attainable standards of physical and mental health, access to suitable healthcare, and support in learning to make healthy and safe choices

Having the opportunity. along with carers, to be heard and involved in decisions which affect them

Best start in life: Ready to succeed

Having opportunities and encouragement to play active and responsible roles in their schools and communities and, where necessary, having appropriate guidance and supervision and being involved in decisions that affect them o

Responsible citizens Protected from abuse, neglect or harm at home, at school and in the community

Having help to overcome social, educational, physical and economic inequalities and

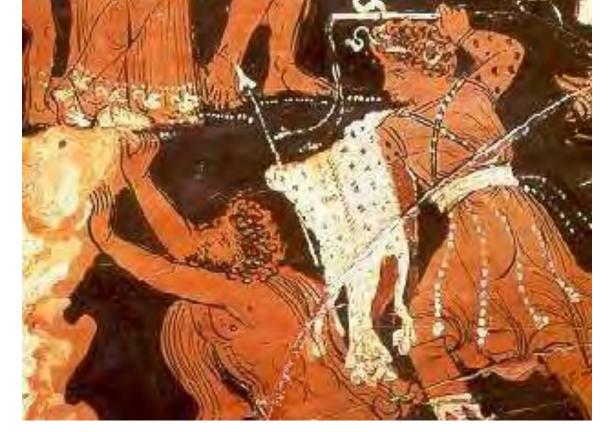

community in which they live

Outcomes:

Desired results

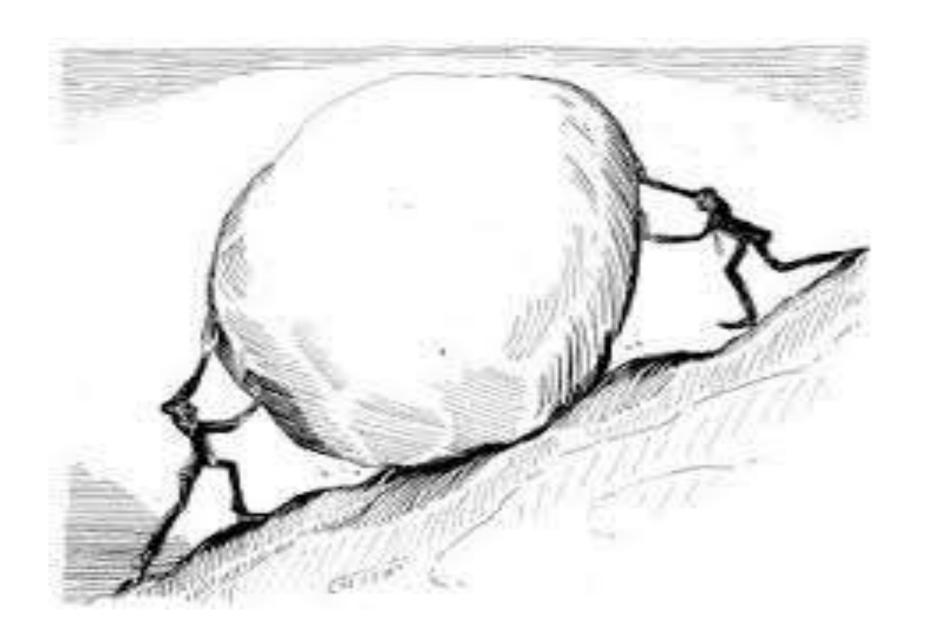

What gets in the way?

Greek Myth - The Punishment of Sisyphus

Greek Myth - The Punishment of Sisyphus

CELCIS 2015: Traveling Together

What gets in the way?

Reasons for failed efforts:

Design Failures

Implementation Failures

- Sustainability Failures

Foster-Fishman and Watson, 2011 (based on Foster-Fishman and Long, 2008; Foster-Fishman, Nowell, and Yang, 2007; Kubish, et al., 2010; Trent and Chavis, 2008)

What gets in the way?

Design Failures

- Disconnect between goals (desired results) and selected strategies
- Unrealistic expectations/time frames
- Insufficient scale and scope
- Insufficient attention to systems characteristics and dynamics

Implementation Failures

- Lack of capacity
- Ineffective coordination and collaboration
- Insufficient attention to feedback and continuous improvement
- Insufficient attention to the process of change

Sustainability Failures

- Lack of attention to sustainability
- Lack of secured, sustained resources

Foster-Fishman and Watson, SCRA Biennial Workshop, 2011

Implementation Gap

RESEARCH IMPLEMENTATION PRACTICE

- Implementation gap
 - We don't use innovations "as intended"
 - We don't build capacity to sustain innovations
 - We don't <u>scale</u> innovations to provide benefits to citizens and society

Insufficient Methods

Best Data Show These Methods, When Used Alone, Do Not Result in Use of Innovations as Intended

- Diffusion / Dissemination of information
- Training
- Passing laws/ mandates/ regulations
- Providing funding/ incentives
- Organization change/ reorganization

In isolation, each of these methods produce very little measurable change (5 to 15%)

Words of Wisdom

"It's not rocket science!"

"There are no magic bullets!"

The Science and Practice of Implementation...

 ... sits at the nexus between a number of fields of study, such as diffusion and dissemination, knowledge translation, improvement science, change management, and systems thinking, with which we are all quite familiar and draws on the "actionable" evidence across these fields to provide practical guidance for the diagnosis and analysis necessary to promote and guide complex systems change.

The Science and Practice of Implementation...

... provides an approach to manage the necessary
technical aspects of change while acknowledging and
embracing the complex and adaptive challenges
involved in creating and sustaining complex systems
change in the fields of health, education, and social
care.

The Science and Practice of Implementation...

... promotes the use of best evidence, through the
review and synthesis of relevant research,
comprehensive and ongoing assessment, data analysis,
small tests of change, use of feedback loops to promote
continuous improvement, and evaluation.

Implementation change Adaptive assessment dissemination SYSTEMS loops promote guide diagnosis evaluation sustaining review guidance small tests relevant research ongoing Applied thinking actionable feedback challenges management evidence embracing Active science technical dynamics data comprehensive practical diffusion knowledge use creating synthesis improvement translation Practice aspects continuous analysis complex

Traveling Together: What Works?

Key to Successful Implementation

The way in which a change process is conceptualized is far more fateful for success or failure than the content one seeks to implement.

Achieving the Vision

Effective Interventions

Effective Implementation Methods

Enabling Contexts

Socially Significant Outcomes

GIRFEC

Active Implementation Frameworks

INTERVENTIONS

 Well defined, effective interventions that are teachable, learnable, doable, and readily assessable

STAGES

Developmental implementation guidance

DRIVERS

 Critical program and organizational supports that are needed to implement and scale-up effective practices

TEAMS

 The group that guides and manages the implementation and scale-up process

IMPROVEMENT CYCLES

 The processes that support teams and organizations efficiently to solve problems and get better

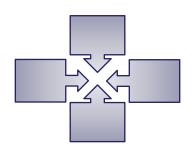

What's Your Role in GIRFEC?

...from an implementation perspective -

What are you <u>saying</u> and <u>doing</u> to achieve the desired outcomes?

How will you know if you are saying and doing it right?

Interventions

Who is saying and doing what differently to achieve the expected (or desired) GIRFEC result?

| Population | Strategies | Expected Results |
|--------------|--|------------------|
| Young People | Something effective has to happen here | Nurtured |

Example "Staying Put"

Building the Infrastructure for "Staying Put"

| Population | Strategies | Expected Results |
|----------------------------------|---|--|
| 16 – 26 year old young people | Carers use "Effective Nurturing Strategies" for/with older youth | Young People are Nurtured |
| Carers | Social Care Workers effectively select, train, and coach Carers | Carers use Effective Nurturing Strategies |
| Social Care Workers | Social Care Supervisors effectively select, train, and coach Social Care Worker | Social Care Workers effectively select, train, and coach Carers |
| Social Care Supervisors | Effective Selection, Training, Coaching of Social Care Supervisors | Social Care Supervisors effectively select, train, and coach Social Care Workers |

Building the Infrastructure for Change

"...we cannot skip links in the chain of logic and expect to achieve outcomes without the intervening steps."

http://tapartnership.org/enterprise/docs/RESOURCE%20BANK/RB-SOC%20APPROACH,%20DEFINITION,%20HISTORY/General%20Resources/Updating SOC Stroul Blau NTAC 2010.pdf

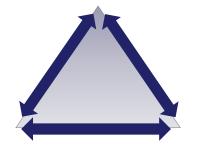

What's Your Role in GIRFEC?

...from an implementation perspective -

What supports will you need to say and do the things that achieve the desired outcomes?

Drivers

Building the Infrastructure for Change

Reliable Benefits

Consistent Uses of Innovations

Help to develop, improve, and sustain practitioners' competence and confidence to implement effective practices

Integrated & Compensatory

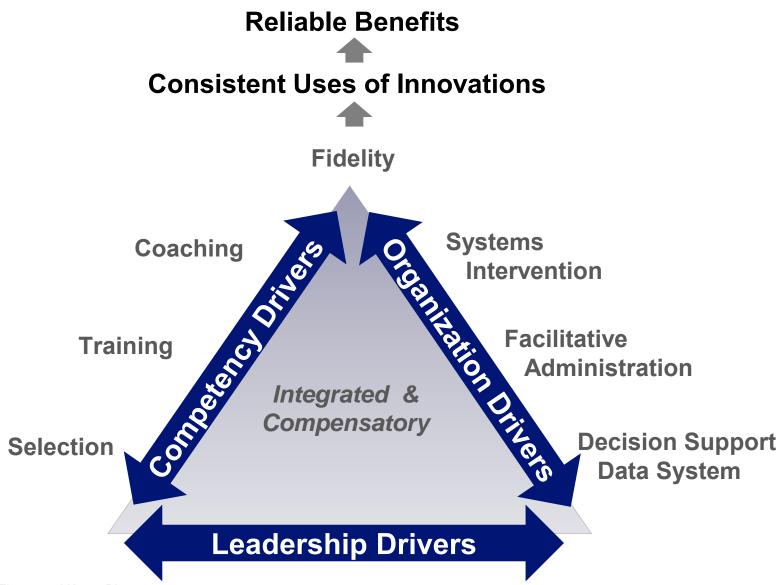

Help ensure sustainability and improvement at the organization and system levels

Leadership Drivers

Help guide leaders to use the right leadership strategies for the situation

www.celcis.org

Implementation Drivers

What's Your Role in GIRFEC?

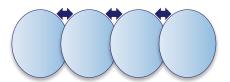

Improvement Cycles

...from an implementation perspective -

How will you help to guide the change process?

Stages

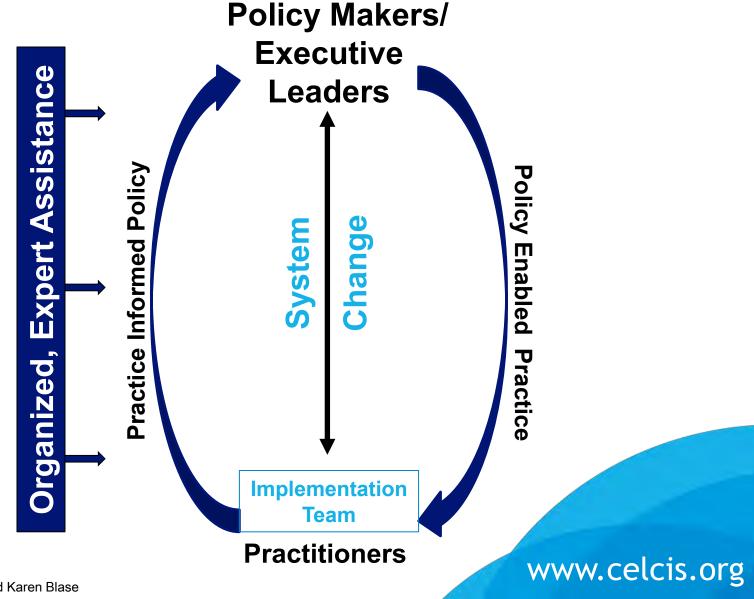

Teams

Creating an Enabling Context

Outcomes

Desired results

Being supported and guided in their learning and in the development of their

skills, confidence and

self-esteem at home, at

school and in the community

Having the highest attainable

mental health, access to suitable

standards of physical and

healthcare, and support in

learning to make healthy

and safe choices

Having opportunities to pile part in activities such as play, recreation and sport which contribute to healthy growth and development, both at home nd in the community

Confident individuals along with carers, to be heard and involved in decisions which

affect them

Best start in life: Ready to succeed

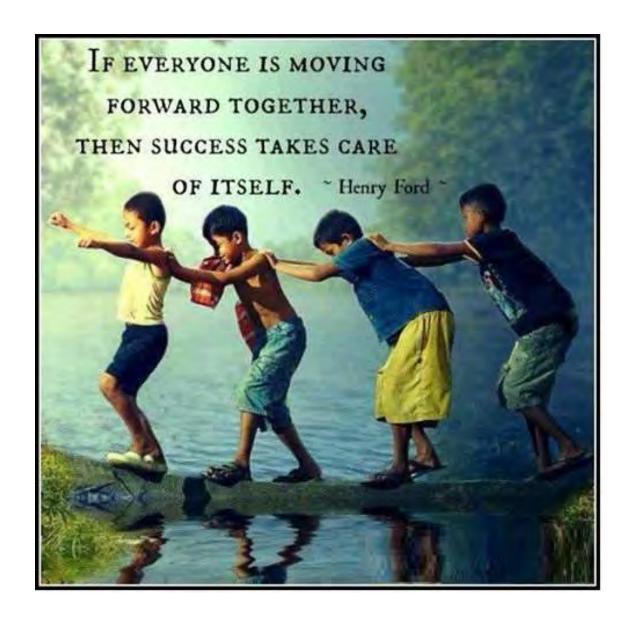

Having opportunities and encouragement to play active and responsible roles in their schools and communities and, where necessary, having appropriate guidance and supervision and being involved in decisions that affect them o

Responsible citizens Protected from abuse, neglect or harm at home, at school and in the community

Safe

Having help to overcome in valid Sey like On: comn

Defines the optimal desired future state

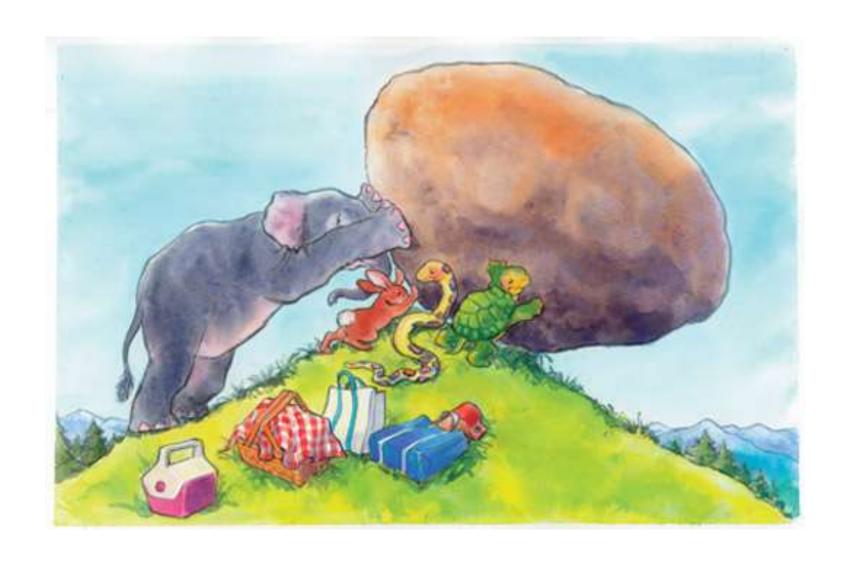

CELCIS 2015: Traveling Together

Summary

- What are you <u>saying</u> and <u>doing</u> to achieve the desired outcomes?
- How will you know if you are saying and doing it right?
- What <u>supports</u> will you need to say and do the practices that achieve the desired outcomes?
- How will you help to guide the change process?
